

---

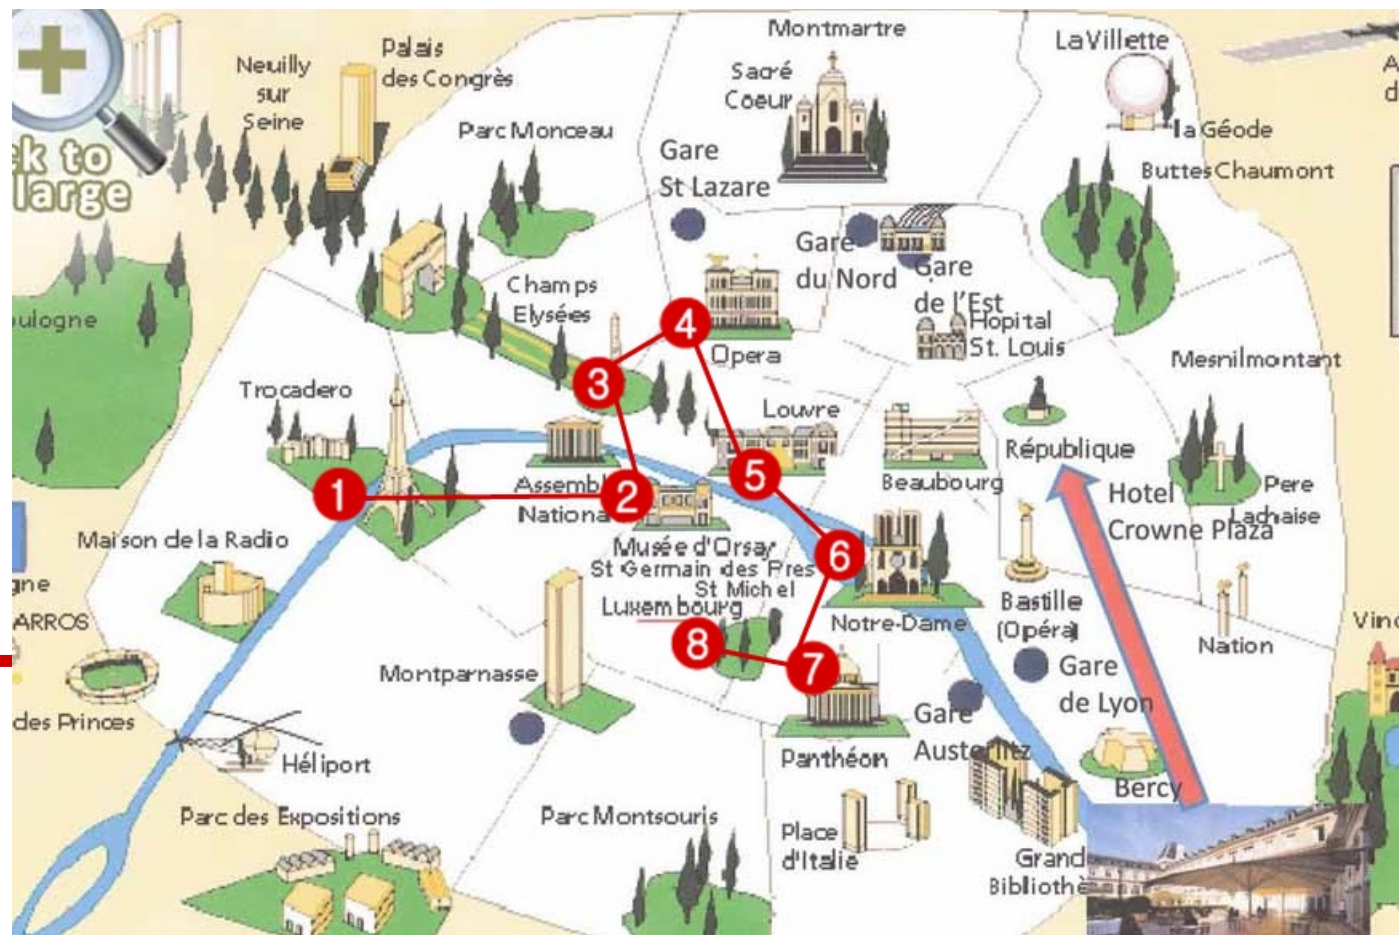

# Travelpad

- A Collaborative Platform for  
Itinerary Planning

---

Team 27

---

# Core Feature

---

- Itinerary Management
    - Plan Schedule
    - specifying which activities are done at which time
  - Todo List
    - To track tasks need to be done for current editing itinerary
    - e.g. buying airline tickets, making hotels reservation.
-

# Core Feature

---

- Vote
    - Users are able to “agree” or “disagree” on a proposed event.
  - Chat room
    - Allow users to discuss concurrently on the chat room.
-

# Core Feature

---

- Spot Feedback
    - Storing the rating and feedback of a spot so that the system can suggest users which spot is recommended.
  - Cost
    - Users can estimate the cost they would spend before the trip.
    - Users may also record the checks they would like to split during the travel.
-

# Core Feature

---

- Export
    - In the end of editing, users can export the whole itinerary as a single file to print out for carrying during their travel.
  - Photo Album and Share Feedback
    - Users can publish and share their itinerary to get others' feedback.
    - They can also upload photos.
-

# Sprint #2 Demo

---

- Register and login
  - Itinerary Management
    - Add event on calendar and map
